Kotka, Finland

I am a 4th Game Programming student at XAMK. Over the past few years I have had a wonderful time attending and organizing events in the Finnish Game industry.

I am a former Psychology student turned engineer looking to be turned into something new again. I am always looking for new challenges to take on.

Skills

Technical skills

PC Building	Linux OS (Arch/Ubuntu)
Troubleshooting	Laptop tinkering
IT Consultation	Great hand-eye coordination

Personal attributes

Composed	Adaptable
Resilient	Quick-thinking
Problem-solver	Customer service

Technician work

I have been building PCs since 2016, when I built my first computer using Linus Tech Tips video as a reference. Since then I have built PCs for my friends and family. In total I have built and set up over 10 different systems. I have also worked with older folk and been a consultant for them.

I have recently gotten into Linux using it as at home permanently and going to be switching to Fedora for my school computer as well in the near future. With all the work (troubleshooting) that I have done with Windows and Linux, I have an extensive history of fixing computers.

I have also worked on and fixed laptops, including screens, batteries and keyboards. Imagine any daily computer device and I have fixed or built one of my own.
