Relevant experience for Virtual Production

I have been working with computers since 2016. In the 10 years time, I have built and troubleshot computers for friends and family. I have 3 elderly family members who I have helped with my IT support skills

I am currently working on a Virtual Production project as a technician and have been working with and managing networks related to Unreal Engine 5.7 For more information, contact Cody Lucero at XAMK (cody.lucero@xamk.fi)
